Subdivision of T. 5 S., R. 25 E.

Of the Salt Lake Base and Meridian,

In the State of Utah

EXECUTED BY

A. Parker Warner, U. S. Cadastral Engineer.

In the capacity of U. S. Surveyor, under Special Instructions dated March 5, 1921
 issued by the United States Surveyor General to govern surveys included in Group
 No. 112, which were approved by the Commissioner of the General Land
 Office, March 25th, 1921, and Assignment Instructions dated May 8th, 1922

Survey commenced May 22, 1922

Survey completed July 22, 1922

T. 5 S., R. 25 E.

Survey commenced May 22, 1922, and executed with a Young & Son's light mountain transit No. 8516, with solar attachment; and W. & L. E. Gurley solar compass No. 11949; unless otherwise specified all azimuth determinations are accomplished with the solar attachment. The instruments were approved by the Assistant Supervisor of Surveys, District No. 7, May 12, 1922, conditional upon satisfactory field tests.

May 22, 1922, at my station near the cor. of secs. 2, 3, 10 and 11, T. 6 S., R. 25 E., Salt Lake Base & Meridian, Utah, in latitude $40^{\circ}19'30''$ N., and in longitude $109^{\circ}06'W.$, at 3h. 40m. a.m., l.m. t., I observe Polaris at eastern elongation, making four observations, two each with the telescope in direct and reverse positions, and mark a point in the line thus determined, on a peg firmly driven in the ground, 5 chains N. of my station.

Azimuth of Polaris at eastern elongation $1^{\circ}27'$

At 8h. a. m., I lay off the azimuth of Polaris $1^{\circ}27'$ to the West, and mark the meridian thus determined, on a stake set firmly in the ground, 5 chains N. of my station.

At 9h. a.m., appt., I set off $40^{\circ}19'30''$ N., on the lat. arcs, $20^{\circ}20'$ N. on the decl. arcs of both instruments, and determine meridians with the solars, which I find agree with the true meridian.

At app. noon, with the lat. arcs of the instruments unchanged, I observe the sun on the meridian, the resulting readings of the declination arcs of the instruments is $20^{\circ}20'$ N., which agrees with the computed declination of the sun

At 3h. p.m., appt. time, with the lat. arcs unchanged, I set off $20^{\circ}23'$ N. on the decl. arcs of both instruments

Chains

and determine meridians with the solars, which I find agree with the true meridian.

All the solar observations during the usual hours of solar work come within 1'30" of the true meridian, I therefore conclude that the adjustments of the instruments are satisfactory.

Unless otherwise specified, all measurements are made with Lallie 5 chain steel tapes, found correct by comparison with the Keuffel & Esser standard steel tape. The measurements are made on the slope, the vertical angle determined, and slope measurements properly reduced to true horizontal distances.

From the Standard cor. of Tp. 5 S., Rs 24 and 25 E., which is an iron post, 3 ins. in diam., 12 ins. above ground, marked and witnessed as described by the Surveyor General.

East on a retracement along S. bdy. of sec. 31.

40.3.5 Fall 59 lks. S. of Standard $\frac{1}{4}$ sec. cor., which is a sandstone, 18x6x5 ins. above ground, marked and witnessed as described by the Surveyor General.

This $\frac{1}{2}$ mile bears N. 89°09'E.

I continue my line and measurement.

80.53 Fall 98 lks. S. of Standard cor. of secs. 31 and 32, which is a sandstone, 10x6x4 ins. above ground, marked and witnessed as described by the Surveyor General.

This $\frac{1}{2}$ mile bears N. 89°27'E.

I offset to Standard cor., and retrace E. along S. bdy. of sec. 32.

40.46 Fall 53 lks. S. of Standard $\frac{1}{4}$ sec. cor., which is a sandstone, 12x6x6 ins. above ground, marked and witnessed as described by the Surveyor General.

This $\frac{1}{2}$ mile bears N. 89°14'E.

Retracement of First Standard Parallel Easting, Township 14 N., Range 10 E., Section 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

General Description.

The land contained within the boundaries of this township may be grouped into two general classifications, extremely rough, broken mountainous land and rolling mountain top. The soil is rocky, gravelly and sandy and is 2nd. and 4th. rates.

The southern and northwestern portions of this township are extremely rough and rugged, being cut by deep, rocky canyons and draws and traversed by rocky ledges that break from the rim of Blue Mountain which traverses the township in a northeasterly direction from the cor. of secs. 29, 30, 31 and 32 to the Colorado, Utah State Line in sec. 13; and in a northerly direction from the 1/2 sec. cor. bet. secs. 25 and 30 to Daniel's Canyon which breaks thru the rim in sec. 5.

From the south boundary of the township which runs over rolling and broken hills, the land rises abruptly over sandstone cliffs and ledges to a height of from 1800 to 2000 ft. to the summit which is reached at the top of the cliffs that form the rim of Blue Mountain; thence northward the land slopes gradually over rolling mountain top until the north boundary of the township is reached.

From the rim of Blue Mountain which traverses the northwestern portion of the township, the land breaks abruptly over cliffs and ledges for a depth of from 2000 to 2500 ft. toward Green River.

The land in the southern and northwestern portions of the township is covered with a dense growth of scrub pinon and cedar timber and undergrowth of the same species.

The land on top of Blue Mountain is covered with an abundant growth of grass which affords excellent feed for the cattle and sheep which use this land as a summer range.

Along the rim of Blue Mountain there is found a narrow

General Description

strip of land on which yellow and bull pine trees grow to a diameter of from two to three feet. This timber is of no marketable value as it is so far removed from any saw-mill, but it is of great value to the settlers for use in building their cabins.

Cub Creek, an alkaline stream, about 2 lks. wide and 4 ins. deep, rises in sec. 10 and thence flows northward to Daniel's Canyon which follows the north boundary, west from sec. 3.

There is a natural lake about 1 chain wide and 5 chains long in sec. 20.

Ellsworth Snow in the SW. $\frac{1}{4}$ of sec. 3 is the only settler living within this township. This claim has been improved by building a one-room cabin, three miles of fences and by digging a well 20 ft. deep, which has about fifteen feet of good, clear water.

CERTIFICATE OF UNITED STATES ~~SURVEYOR~~

U. S. Cadastral Engineer

I, A. Parker Warner

~~U. S. Surveyor~~, hereby certify upon honor that, in pursuance

of special instructions received from the U. S. Surveyor General for Utah

bearing date of the 5th day of March, 19 21, I have well, faithfully, and truly

in my own proper person, and in strict conformity with said instructions, the Manual of Surveying Instructions, and the laws of the United States, surveyed all those parts or portions of

Retracement and Resurvey of First Standard Parallel South, thru R. 25

Subdivisions of T. 5 S., R. 25 E.

Retracement and Resurvey of Colorado, Utah State Line from 232 mi. cor.

to 238 mi. cor., thru T. 5 S., R. 25 E.

of the Salt Lake

Base & Meridian, in the State of Utah

and date diagram

the foregoing field notes as having been executed by me, and under my direction; and that all the corners of

said survey have been established and perpetuated in strict accordance with the Manual of Surveying Instructions, and the special written instructions of the U. S. Surveyor General for

Utah

and in the specific manner described in the field notes, and that the foregoing are the original field notes of such survey.

Helena, Mont., February 16. 1923.

A. Parker Warner

U. S. Cadastral Engineer.

APPROVAL.

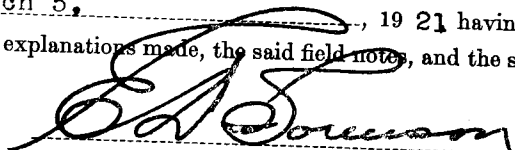

OFFICE OF THE UNITED STATES SURVEYOR GENERAL,

Salt Lake City, Utah. Aug. 30., 19 23.

The foregoing field notes of the survey of Retracement of the First Standard
Parallel South, thru Range No. 25 East.; Resurvey of First Standard
Parallel South, thru R. 25 E. ; Retracement of Colorado, Utah State
Line, from 232 mi. cor. to 238 mi. cor. ; Resurvey of Colorado, Utah
State Line, from 232 mi. cor. to 238 mi. cor. ; Subdivision of Town-
ship No. 5 South, Range No. 25 East, Salt Lake Base and Meridian.

executed by A. Parker Warner

under his special instructions dated March 5., 19 21 having been critically examined, and the necessary corrections and explanations made, the said field notes, and the surveys they describe, are hereby approved.

U. S. Surveyor General.

I certify that the foregoing transcript of the field notes of the above-described surveys in
has been correctly copied from the original notes on file in this office.

U. S. Surveyor General.

EXECUTED BY

A. Parker Warner

Cadastral Engineer
 in the capacity of U. S. Surveyor, under Special Instructions dated March 5, 1921,
 and supplemental instructions dated April 1, 1921;
 issued by the United States Surveyor General to govern surveys included in Group
 No. 112, which were approved by the Commissioner of the General Land
 Office, March 25, 1921, and Assignment Instructions dated May 8, 1922.

Survey commenced June 14 1922.

Survey completed October 24, 1922.

Dates shown in green = retracements.

Tests of Instruments.

Survey commenced June 14 1922, and executed with a Young & Son's light mountain transit No. 8516, with solar attachment; and W. & L. E. Gurley solar compass No. 11949; unless otherwise specified all azimuth determinations are accomplished with the solar attachment. The instruments were approved by the Assistant Supervisor of Surveys, District No. 7, May 8 1922, conditional upon satisfactory field tests.

June 11, 1922 at my camp in sec. 3, T. 6 S., R. 25 E., Salt Lake Base and Meridian, in latitude $40^{\circ}19'30''$ N., and in longitude $109^{\circ}06'W.$, I examine the adjustments of the instruments and correct all errors. I then test the solar apparatus of each instrument by comparing its indications hourly with the true meridian established by Polaris observation May 22, 1922, heretofore described.

At 9h.10m. a.m., appt.t., I set off $40^{\circ}19'30''N.$, on the lat. arc; $23^{\circ}04'N.$, on the decl. arc, of each instrument, and determine meridians with the solars which I find agree with the true meridian.

At appt. noon, with the lat. arcs on both instruments unchanged, I observe the sun on the meridian, the resulting readings of the declination arcs on the instruments is $23^{\circ}05'N.$, which agrees with the computed declination of the sun.

At 3h.0m.p.m., appt. t., with the lat arcs unchanged, I set off $23^{\circ}05'N.$, on the decl. arcs; and determine a meridian with the solar which I find agrees with the true meridian.

All the solar observations during the usual hours of solar work come within $1'30''$ of the true meridian, I therefore conclude that the adjustments of the instruments are satisfactory.

Unless otherwise specified, all measurements are made

Retracement of Colorado, Utah State Line, thru T. 6 S., R. 25 E.

CHAINS

REMARKS

with Lallie 5 chain steel tape, found correct by comparison with the Keuffel & Esser standard steel tape. The measurements are made on the slope, the vertical angle determined, and slope measurements properly reduced to the true horizontal distance.

General Description T. 6 S., R. 25 E.

The land contained within the boundaries of the portion of this township surveyed and resurveyed under Group 112 may be classified under the two general headings, mountainous and level. The soil is sandy, rocky and gravelly; and ranges in quality from 2d to 4th rate.

The northeastern and southwestern portions of this township contain rough, broken, mountainous land, which is covered with a dense growth of scrub pinon pine and cedar timber and undergrowth of the same species; while in the central portion of the township the land, which is gently rolling and level is covered with an abundance of sagebrush and shadscale. The northeastern portion of the township is traversed by high, broken, rocky ridges and spurs; and cut by deep canyons. The southwestern portion is traversed by Raven Ridge, which extends in a northwesterly direction from section 32, through section 30.

What may be termed the one main ridge through the township is the isolated rocky reef, locally known as Snake John Reef, which enters the township in section 36, projects in a northwesterly direction through the township through section 19.

The land on the south side of Snake John Reef is gently rolling and level; the soil is sandy and is capable of producing small crops under intensive cultivation and by the aid of irrigation.

There is no living water within the township; the water used to supply the cattle and sheep that use this land for grazing, is stored in drainage tanks built at the mouths of several of the largest washes.

Cliff Creek wash, which is dry for the most part of the year, and which enters the township through section 19, affords the main drainage of the land within this township.

There are two main highways that traverse the town-

General Description T. 6 S., R. 25 E.

ship, the Victory Highway, which is the main highway from the East to the West; and the road from Jensen Utah to Rangely Colorado.

There are no settlers within the portion of the township surveyed under this group.

CERTIFICATE OF UNITED STATES SURVEYOR

Cadastral Engineer

I, A. Parker Warner, U. S. ~~Surveyor~~ ^{Cadastral Engineer}, hereby certify upon honor that, in pursuance

of special instructions received from the U. S. Surveyor General for Utah and supplemental instruction bearing date of the 5th day of March, 19 21, I have well, faithfully, and truly

in my own proper person, and in strict conformity with said instructions, the Manual of Surveying Instructions, and the laws of the United States, surveyed all those parts or portions of Retracement and resurvey of Colorado, Utah State Line from 226 mi. cor. to 232 mi. cor., thru T. 6 S., R. 25 E., Retracement of E. bdy. of T. 6 S., R. 25 E., Retracement and resurvey of a portion of S. bdy. of T. 6 S., R. 25 E., Retracement and resurvey of a portion of W. bdy. of T. 6 S., R. 25 E., West bdy. of T. 6 S., R. 25 E., Retracement of a portion of subdivisions of T. 6 S., R. 25 E., Resurvey of a portion of subdivisions of T. 6 S., R. 25 E., Survey of a portion of subdivisions of T. 6 S., R. 25 E. of the Salt Lake

Base & Meridian, in the State of Utah, which are represented in and date diagram on dates shown on said diagram the foregoing field notes as having been executed by me, and under my direction; and that all the corners of said survey have been established and perpetuated in strict accordance with the Manual of Surveying Instructions, and the special written instructions of the U. S. Surveyor General for Utah and in the specific manner described in the field notes, and that the foregoing are the original field notes of such survey.

Helena, Montana, March 20, 1923

A. Parker Warner

U. S. Cadastral Engineer.

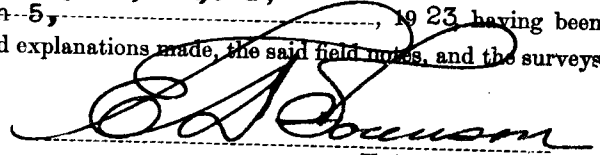

APPROVAL.

OFFICE OF THE UNITED STATES SURVEYOR GENERAL,

Salt Lake City, Utah, Oct. 15, 1923

The foregoing field notes of the survey of Retracement and Resurvey of Utah-Colo- rado Boundary Line; Retracement of East Boundary; Retracement and Resurvey of South Boundary; Retracement and Resurvey and Survey of West Boundary; Retracement, Resurvey, and Survey of Subdivision ; Of Township Number 6 South, Range Number 25 East, S. L. B. & M, Utah.

executed by A. Parker Warner and Supplemental instructions dated April, 1 1921; under his special instructions dated March 5, 19 23 having been critically examined, and the necessary corrections and explanations made, the said field notes, and the surveys they describe, are hereby approved.

U. S. Surveyor General.

I certify that the foregoing transcript of the field notes of the above-described surveys in _____, has been correctly copied from the original notes on file in this office.

General Description.

From the corner of secs. 25, 26, 35 and 36, this line between secs. 35 and 36 runs over rolling mountain top for a distance of 1.50 chains to the rim of Blue Mountain which at this point bears E., and W. From the rim of Blue Mountain the line runs over country that is exceptionally rough and mountainous, descending 1580 ft. in less than a mile; being traversed by deep, rocky canyons and crossed by high rocky ridges. At the foot of Blue Mountain the land slopes more gently to the Standard corner of secs. 35 and 36.

The soil is rocky and is therefore absolutely unfit for

General Description

cultivation or any agricultural purpose.

The land is covered with a dense growth of scrub timber and undergrowth which is of no value because of the great difficulty experienced in procuring it.

All lines run in 1922, by A. Parker Warner.

Tests of Instruments

Survey commenced October 7, 1922 and executed with a Young & Son's light mountain transit No. 8516, with solar attachment; and W. & L. E. Gurley solar compass No. 11949; unless otherwise specified all azimuth determinations are accomplished with the solar attachment.

The instruments were approved by the Assistant Supervisor of Surveys, District No. 7, May 12, 1922, conditional upon satisfactory field tests.

October 7, 1922 at my camp in sec. 6, near the closing corner for T.7 S., Rs.24 and 25 E., Salt Lake Base and Meridian, Utah, in latitude $40^{\circ}15'N.$, and in longitude $109^{\circ}12'W.$, at 6h. 35m. p.m., l.m.t., I observe Polaris at eastern elongation with Young & Son's light mountain transit No. 8516, making four observations, two each with the telescope in direct and reverse positions, and mark a point in the line thus determined, on a peg firmly driven in the ground, 5 chains N. of my station.

Azimuth of Polaris at eastern elongation $1^{\circ}27'30''$.

October 8; at 7h.30m. a.m., I lay off the azimuth of Polaris $1^{\circ}27'30''$ to the west, and mark the meridian thus determined, on a stake set firmly in the ground, 5 chains N. of my station.

At 8h. a.m., l.m.t., I place both instruments on the meridian determined by Polaris. I set off $40^{\circ}15'N.$, on the lat. arcs, $5^{\circ}41'30'' S.$, on the decl. arcs of both instruments, and determine meridians with the solars, which I find agree with the true meridian.

At app. noon, with the lat. arcs on both instruments unchanged, I observe the sun on the meridian, the resulting readings of the declination arcs on the instruments is $5^{\circ}47'S.$, which agrees with the computed declination

Retracement of Colorado, Utah State Line thru T. 7 S.

Chains

of the sun.

At 3h.p.m., 1.m.t., with the lat. arcs unchanged, I set off $5^{\circ}49'30''$ S., on the decl. arcs of all instruments and determine meridians with the solars, which I find agree with the true meridian.

All the solar observations during the usual hours of solar work comes within $1'30''$ of the true meridian, I therefore conclude that the adjustments of the instruments are satisfactory.

Unless otherwise specified, all measurements are made with Lallie 5 chain tape, found correct by comparison with the Keuffel & Esser standard steel tape.

The measurements are made on the slope, the vertical angle determined, and slope measurements properly reduced to true horizontal distances.

From the 219th. mile corner on the Colorado, Utah State Line, which is a sandstone $4 \times 2 \times 4$ ins. above ground marked and witnessed as described by the Surveyor General.

North on a retracement along the Colorado, Utah State Line, along the 220th. mile.

79.69 Fall 14 lks. E., of 220th. mile cor., which is a sandstone $14 \times 5 \times 6$ ins. above ground, marked and witnessed as described by the Surveyor General.

This mile bears N. $0^{\circ}06'W$.

November 15, 1922 at my camp in sec. 15, near the cor. of secs. 15, 16, 21 and 22, T. 7 S., R. 25 E., Salt Lake Base and Meridian, Utah; in latitude $40^{\circ}13'N.$, and in longitude $109^{\circ}09'W.$, at 3h. 57m. a.m., l.m.t., I observe Polaris at western elongation with Young & Son's light mountain transit No. 8516, making four observations two each with the telescope in direct and reverse positions, and mark a point in the line thus determined

Tests of Instruments.

on a peg firmly driven in the ground, 5 chains N. of my station.

Azimuth of Polaris at western elongation $1^{\circ}26'36''$.

November 15; at 7h.45m. a.m., I lay off the azimuth of Polaris $1^{\circ}26'36''$ to the E., and mark the meridian thus determined, on a stake set firmly in the ground, 5 chains N. of my station.

At 8h.a.m., l.m.t., I place Young & Sons light mountain transit No. 8516, and W. & L. E., Gurley solar compass No. 11949, on the meridian determined by Polaris. I set off $40^{\circ}13'N.$, on the lat. arcs, $18^{\circ}20'S.$, on the decl. arcs of both instruments, and determine meridians with the solars, which I find agree with the true meridian.

At app. noon with the lat. arcs. of both instruments unchanged, I observe the sun on the meridian, the resulting readings of the declination arcs on the instruments is $18^{\circ}25'S.$, which agrees with the computed declination of the sun.

At 3h.p.m., l.m.t., with the lat. arcs unchanged, I set off $18^{\circ}26'S.$, on the decl. arcs of both instruments and determine meridians with the solars, which I find agree with the true meridian.

All the solar observations during the usual hours of solar work comes within $1'30''$ of the true meridian, I therefore conclude that the adjustments of the instruments are satisfactory.

All measurements were made with a Lallie 5 chain tape, found correct by comparison with the Keuffel & Esser standard steel tape.

The measurements were made on the slope, the vertical angles determined, and slope measurements properly reduced to the true horizontal distances.

General Description

This township which is situated on the divide between Green and White Rivers, at a distance of about twenty five miles southeast of the town of Jensen, borders on the Colorado, Utah State Line and is made fractional by this State Boundary traversing the township from South to North thru the east range of sections.

The land contained within this township varies from rough, broken bad lands to rolling prairie; the soil ranges from rocky to sandy and gravelly loam.

There are three well defined ridges that traverse this township. The divide between Green and White Rivers, Raven Ridge and Squaw Ridge. The divide between Green and White Rivers traverses the township in a northeasterly direction from section 30 on the west boundary, thru sec. 12 on the Colorado, Utah State Line. Raven Ridge and Squaw Ridge traverse the township in a northwesterly direction from section 38 thru section 5.

From the summit of Raven Ridge, which contained the land of the greatest elevation in the township, the land slopes towards the northeast over rolling prairie land to the north boundary of the township; and towards the southwest over broken and rocky ridges, broken bad lands to what is locally known as Dead Man Bench.

There are two main highways that run thru this township, the road from Jensen to Watson which enters the township in sec. 6 and leaves thru sec. 31 and the road from Jensen Utah, to Rangely Colorado, which enters the township in sec. 4 and leavesthru sec. 25.

There is no living water within this township, the only water being found that confined in two reservoirs that have been constructed in sec. 25 by Allee Lopez.

There are indications of oil as shown in oil shale which is found in great abundance in secs. 5, 6, 7 and 8.

General Description

This land containing oil shale has been filed on and the assessment work on most of the claims has been done. The California Oil and Refining Company have located a claim in section 7 on which they are at present drilling a well. The well which is said to be some four hundred feet deep, shows indications of oil, but as yet no crude oil has been uncovered.

Dead Man Bench is covered with grass in such abundance as to furnish excellent winter feed for the great number of sheep which make this their winter range.

Knox, Stewart and Evans have located claims in section 10. Two of these settlers, namely Knox and Evans have built board shacks on their claims, but have made no other improvements.

U. S. Cadastral Engineer
CERTIFICATE OF UNITED STATES SURVEYOR.

I, A. Parker Warner, ~~U. S. Surveyor~~, hereby certify upon honor that, in pursuance of special instructions received from the U. S. Surveyor General for Utah bearing date of the 5th. day of March, 1921, I have well, faithfully, and truly in my own proper person, and in strict conformity with said instructions, the Manual of Surveying Instructions, and the laws of the United States, surveyed all those parts or portions of The Retracement and Resurvey of the Colorado, Utah State Line from the 219th. mile cor. to the 226th. mile cor.

South Boundary of T. 7 S., R. 25 E.

West Boundary of T. 7 S., R. 25 E.

Subdivision of T. 7 S., R. 25 E. of the Salt Lake Base & Meridian, in the State of Utah, which are represented and date diagram on dates shown on said diagram the foregoing field notes as having been executed by me, and under my direction; and that all the corners said survey have been established and perpetuated in strict accordance with the Manual of Surveying Instructions, and the special written instructions of the U. S. Surveyor General for Utah and in the specific manner described in the field notes, and that the foregoing are the original field notes of such survey.

Helena, Montana, Feb. 26, 1923

A. Parker Warner

~~U. S. Surveyor~~
 U. S. Cadastral Engineer

APPROVAL.

OFFICE OF THE UNITED STATES SURVEYOR GENERAL,

Salt Lake City, Utah Sept. 29, 1923

The foregoing field notes of the survey of Retracement and Resurvey of the Colorado Utah State Line, from the 219 mi. cor., to the 226 mile cor.

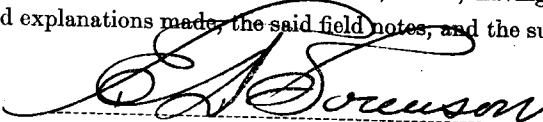

South Boundary of T. 7 S., R. 25 E.

West Boundary of T. 7 S., R. 25 E.

Subdivision of T. 7 S., R. 25 E.

executed by A. Parker Warner, U. S. Cadastral Engineer

under his special instructions dated March 5th., 19 21, having been critically examined, and the necessary corrections and explanations made, the said field notes, and the surveys they describe, are hereby approved.

 U. S. Surveyor General.

I certify that the foregoing transcript of the field notes of the above-described surveys in _____, has been correctly copied from the original notes on file in this office.

Chains

Survey commenced May 24, 1922 and executed with Young & Sons solar transits Nos. 8542 and 8534, the horizontal limbs being provided with two double verniers, reading to single minutes of arc, which is also the least count of the verniers of the latitude and declination arcs.

The instruments were approved by the Assistant Supervisor of Surveys, District No. 6, May 8, 1922, conditionally upon satisfactory field test, a record of which follows herewith.

Unless otherwise specified all measurements are made with Lallie steel tapes 5 chains in length compared with a Lufkin standard steel tape and found correct. The measurements are made on the slope, the vertical angle determined, and the slope measurements properly reduced to true horizontal distances.

May 24, 1922, in camp in sec. 10, T. 37 S., R. 1 E., Salt Lake Base and Mer., in latitude $37^{\circ} 36' 30''$ N., longitude $111^{\circ} 50' W.$, at $3^h 31.2^m$ by my watch which I set to correct local mean time by a meridian observation the day before, I observe Polaris at eastern elongation, making four observations, two each with the telescope in direct and reversed positions, reading the deflection angle from a tack in a peg firmly driven in the ground, 10 chs. N., west to Polaris:

Azimuth of Polaris at eastern elongation $1^{\circ} 24' 51''$

Mean deflection angle $4^{\circ} 3' 00''$

True bearing of mark N. $5^{\circ} 27' 51''$ E.

May 24, 1922, at 7:30 a. m., app. t., I lay off $5^{\circ} 28'$ to the west, and mark a point in the meridian thus determined, with a nail in a hub driven firmly in the ground, 10 chs. N. of my station.

May 24, 1922, at 8 0 a. m., app. t., I set off

Resurvey of N. Bdy. of T. 37.S., R. 1 E.

Chains

37° 36' 30" N.; on the lat. arcs; 20° 42 $\frac{1}{2}$ ' N., on the decl. arcs; and determine a meridian with the solars which I find agrees with the true meridian.

At app. noon, with the lat. arcs unchanged, I observe the sun on the meridian; the resulting reading of the decl. arcs is 20° 44' N., which agrees with the computed declination of the sun.

At 4^h 0^m p.m. app. t. with the lat. arcs unchanged, I set off 20° 46 $\frac{1}{2}$ ' N: on the decl. arcs; and determine a meridian with the solars which I find to agree with the true meridian.

As all of the solar observations made during the usual hours of solar work come within 1' 30" of the true meridian, I conclude that the adjustment of the instruments are satisfactory.

From the cor. of Tps. 36 and 37 S., Rs. 1 E. and 1 W., on the Salt Lake Meridian, which is a limestone, 24 x 10 ins., 16 ins. above ground, marked and witnessed as described by the surveyor general,

General Description.

This township is composed of very broken land. Grain-
ing in all directions from Fairview Peak, which
is located in the NW. cor. of sec. 9. the peak is
flat on top, breaking off in pink cliffs to the south
which gives it the local name of Pink Point. It
forms the very south end of the Wasatch Range of
mountains, having an elevation of approximately
8000 ft. and breaking off abruptly into badlands

Subdivision of T. 37.S., R. 10E., S. 22

Chains

locally known as the Blues; on the south and west there is a large flat, about $\frac{1}{2}$ mile wide and $1\frac{1}{2}$ miles long, running thru secs. 8, 17 and 18; called the " Slope " which is fine grazing land, but extremely gravelly as are " Horse Benches " in secs. 11 and 14. These benches have considerable slope to the NE. and are badly cut up by draws, 15 to 50 ft. deep. There are two sage brush flats in the SW. cor. which have very rich sandy soil. Canaan and Horse Springs Creeks rise on the E. side of the peak, and flow about 10 ins. of good water each, for a short dist., when they sink. There are several streams flowing from the S. and W. slope of the peak, but they flow thru badlands and are very alkaline.

There is a fine growth of yellow pine timber about the Peak, while the lower reaches have a dense growth of scrub cedar and pinon pine. The " Slope " and " Horse Benches " together with many other parts of the Tp. have a dense growth of scrub oak, bitter berry, service berry and thimble berry brush.

There are no signs of mineral, coal or oil in the Tp. and no one living on it, altho the " Horse Benches " are wanted as grazing homesteads.

T. 37 S., R. 2 E.

Chains

Survey commenced July 2, 1922, and executed with Young & Sons solar transits Nos. 8534 and 8542, the horizontal limbs being provided with double verniers, reading to single minutes of arc, which is also the least count of the verniers of the latitude and declination arcs.

The instruments were approved by the Assistant Supervisor of Surveys, district No. 6, May 8, 1922, conditionally upon a satisfactory field test, a record of which follows herewith.

Unless otherwise specified all measurements are made with Lallie steel tapes 5 chains long, compared with a Lufkin standard steel tape and found correct. The measurements are made on the slope, the vertical angle determined, and the slope measurements properly reduced to horizontal distances.

July 2, 1922 in camp in NE $\frac{1}{4}$ NE $\frac{1}{4}$ of sec. 6, T. 37 S., R. 3 E., Salt Lake Base and Merid., in latitude $37^{\circ} 38' N.$, longitude $111^{\circ} 40' W.$, at $0^h 58.3^m$ a. m. by my watch which agrees with local mean time, I observe Polaris at eastern elongation, making four observations, two each with the telescope in direct and reversed positions, reading the deflection angle from a nail in a stump about 15.00 chs. NE. of my station, north and west to Polaris:

Azimuth of Polaris at eastern elongation $1^{\circ} 24' 34''$.

Mean of deflection angle $59^{\circ} 55' 30''$.

True bearing of mark $N. 61^{\circ} 20' E.$

July 2, 1922, at $8^h 0^m$ a.m. app. t., I set off $37^{\circ} 38'$

N. on the lat. arcs; $23^{\circ} 6\frac{1}{4}' N.$, on decl. arcs;

and determine a meridian with the solars which I find to agree with the true meridian.

At app. noon, with the lat. arcs. unchanged, I observe the sun on the meridian; the resulting reading of the

South Boundary of T. 37 S., R. 2 E.

Chains

decl. arcs. is $23^{\circ} 6\frac{1}{2}'$ N., which agrees with the computed declination of the sun.

At 4^h 0^m p.m. app. t., with the latitude arcs unchanged, I set off $23^{\circ} 7\frac{3}{4}'$ N., on the decl. arcs; and determine a meridian with the solars which I find to agree with the true meridian.

As all of the solar observations made during the usual hours of solar work come within 1' 30" of the true meridian, I conclude that the adjustments of the instruments are satisfactory.

From the cor. of Tps. 37 and 38 S., Rs. 1 and 2 E., heretofore described.

General Description.

This township lies on a general E. and NE. drainage and is composed of steep sandstone ridges and deep narrow canyons, with the exception of some narrow sagebrush flats where the washes widen out in the NE. cor. The soil is all of clay and a very poor quality, with a great deal of rock.

There are a few yellow pine and fir trees on the W. side of the deepest gulches, but nearly all the timber is scrub cedar and pinon pine, with many dense patches of bitter berry, service berry and scrub oak undergrowth.

There are seeps of alkali water all along Collett Wash, in the S. side, with Camp Springs, (of alkali and iron water), in the wash in sec. 36.

Mossy Springs in NE $\frac{1}{4}$ SE $\frac{1}{4}$ sec. 18, is very good water and there are a few seeps of alkali water in some of the washes along the W. side.
There are no settlers and no indication of coal or oil.

CERTIFICATE OF UNITED STATES ~~SURVEYOR~~ ^{TRANSITMAN}

I, Eddie S. C. Smith, ^{Transitman} ~~Surveyor~~, U. S. ~~Surveyor~~, hereby certify upon honor that, in pursu-

of special instructions received from the U. S. Surveyor General for Utah
bearing date of the 12th day of November, 1921, 19 , I have well, faithfully, and
in my own proper person, and in strict conformity with said instructions, the Manual of Surveying In-
structions, and the laws of the United States, surveyed all those parts or portions of the South Boundary
East Boundary, North Boundary and Subdivisions of T. 37 S., R. 2 E.

of the Salt Lake Base
and Principal Meridian, in the State of Utah
and date diagram on dates shown on said diagram
the foregoing field notes as having been executed by me, and under my direction/and that all the corners
said survey have been established and perpetuated in strict accordance with the Manual of Surveying In-
structions, and the special written instructions of the U. S. Surveyor General for Utah
and in the specific manner described in the field notes, and that the foregoing are the original field notes
such survey.

Helena, Montana.
February 15, 1923.

U. S. ~~Surveyor~~ ^{Transitman}

APPROVAL.

OFFICE OF THE UNITED STATES SURVEYOR GENERAL,

_____, 19
The foregoing field notes of the survey of _____

executed by _____
under his special instructions dated _____, 19 , having been

T. 36 S., R. 2 E.

Survey commenced July 30, 1922, and executed with Young & Sons solar transits No. 3542 and 3534, the horizontal limbs being provided with two double verniers, reading to single minutes of arc, which is also the least count of the verniers of the latitude and declination arcs.

The instruments were approved by the Assistant Supervisor of Surveys, District No. 6, May 8, 1922, conditionally upon a satisfactory field test, a record of which follows herewith.

Unless otherwise specified all measurements are made with Lullie steel tapes 5 chains in length compared with a Lufkin standard steel tape and found correct. The measurements are made on the slope, the vertical angle determined, and the slope measurements properly reduced to true horizontal distances.

July 30, 1922, in camp in the NE $\frac{1}{4}$ NE $\frac{1}{4}$ of sec. 6, T. 37 S., R. 3 E., Salt Lake Base and Mer.; in latitude $37^{\circ} 38'$ N., longitude $111^{\circ} 40'$ W., upon the true meridian established July 8, as described in the field notes of the South Boundary of T. 37 S., R. 2 E., I test the solar attachments as follows:

At 3 h 35 a. m., app. t., I set off $37^{\circ} 38'$ N., on the lat. arcs; $13^{\circ} 37\frac{1}{2}'$ N., on the decl. arcs; and determine a meridian with the solars which I find to agree with the true meridian.

At app. noon, with the lat. arcs unchanged, I observe the sun on the meridian; the resulting reading of the decl. arcs is $13^{\circ} 34\frac{1}{2}'$ N., which agrees with the computed declination of the sun.

At 4 h 05 p. m., app. t., with the lat. arcs unchanged, I set off $13^{\circ} 32\frac{1}{2}'$ N., on the decl. arcs; and determine a meridian with the solars which I find to agree with the true meridian.

As all of the solar observations made during the usual

Resurvey of W. Bdy. of T. 36 S., R. 2 E.

Chains

hours of solar work come within $1^{\circ}30''$ of the true
 meridian, I conclude that the adjustments of the in-
 struments are satisfactory.

Chains

The old closing cor. of Tps. 36 S., Ra. 1 and 2 E., which is a sandstone, 5 x 5 ins., 20 ins. above ground, marked and witnessed as described by the surveyor general, bears East, 1.52 chs. dist. I destroy this cor. A thorough search along this line has failed to reveal any trace of other old corners.

Land, mountainous.

Soil, rocky clay, 3rd rate.

Timber, scrub cedar and pinon pine.

Undergrowth, bitter berry, service berry and silver leaf

Having found the W. end of the Seventh Standard Parallel South, thru R. 2 E. first and my camp being located conveniently for the work on that end, I deem it expedient to survey it from W. to E. instead of from E. to W. according to instructions.

From the standard cor. of Tps. 35 S., Rs. 1 and 2 E., heretofore described,

East, on a random line, on S. bdy. of sec. 31.

39.77 A point 15 lks. N. of the standard $\frac{1}{4}$ sec. cor., which is a sandstone, 10 x 8 ins., 10 ins. above ground, marked and witnessed as described by the surveyor general. Offset to the $\frac{1}{4}$ sec. cor. and continue measurement.

39.31 A point 29 lks. S. of the standard cor. of secs. 31 and 32, which is a sandstone, 6 x 4 ins., 30 ins. above ground, marked and witnessed as described by the surveyor general.

The W. half of this mile bears S. 89° 47' E., and the E. half N. 89° 35' E. Distances 39.77 and 39.54 respectively.

From the standard cor. of secs. 31 and 32,

East, on a random line, on S. bdy. of sec. 32.

39.96 A point 20 lks. S. of the standard $\frac{1}{4}$ sec. cor., which is a sandstone, 12 x 4 ins., 20 ins. above ground, marked

Retracement of the Seventh Standard Parallel South, thru R. 2 E.

Chains

and witnessed as described by the surveyor general.

Offset to the $\frac{1}{4}$ sec. cor. and continue measurement.

79.72 A point 19 lks. S. of the correct position for the standard cor. of secs. 32 and 33, as determined from the bearing trees, the stone being gone.

The W. half of this mile bears N. $89^{\circ} 43'$ E., and the E. half N. $89^{\circ} 44'$ E. Distance 39.96 and 39.76 respectively.

From the true position for the standard cor. of secs. 32 and 33,

East, on a random line, on S. bdy. of sec. 33.

39.59 A point 27 lks. S. of the standard $\frac{1}{4}$ sec. cor. Offset to the $\frac{1}{4}$ sec. cor. and continue measurement.

80.00 I am unable to find any trace of the old standard cor. of secs. 33 and 34. Set temp. stake.

From the temp. stake set for the standard cor. of secs. 33 and 34,

East, on a random line, on S. bdy. of sec. 34.

37.25 A point 43 lks. S. of the standard $\frac{1}{4}$ sec. cor. Offset to the $\frac{1}{4}$ sec. cor. and continue measurement.

77.25 I am unable to find any trace of the standard cor. of secs. 34 and 35. Set temp. stake.

From the temp. stake set for the standard cor. of secs. 34 and 35,

East, on a random line, on S. bdy. of sec. 35.

35.91 A point 60 lks. S. of the standard $\frac{1}{4}$ sec. cor. Offset to the $\frac{1}{4}$ sec. cor. and continue measurement.

75.91 I am unable to find any trace of the standard cor. of secs. 35 and 36. Set temp. stake.

From the temp. stake set for the standard cor. of secs. 35 and 36.

Retracement of the Seventh Standard Parallel South, between Tps. 34 and 35 S.,

Chains

- East, on a random line, on S. bdy. of sec. 36.
- 10.44 A point 39 lks. S. of an old witness cor.; not mentioned in the field notes.
- Offset to witness cor. and continue measurement.
- 38.42 A point 24 lks. S. of the standard $\frac{1}{4}$ sec. cor.
- Offset to the $\frac{1}{4}$ sec. cor. and continue measurement.
- 39.12 Top of a series of precipitous ledges, set flag on the random line, in a wash at the foot of the ledges and leave a flag at my station on top of the ledges.
- From the flag in the bottom of the wash; vertical angle to flag on top of ledges is plus 27° . As there is a series of precipitous ledges on the E. of the wash. I set a flag on the random line on top of them; vertical angle is plus 27° . Lay off a base, North, to a point 5.00 chs. dist., from which the flag on top of the ledges to the W. bears S. $72^\circ 3' W.$, and flag on top of the ledges to the E. bears S. $69^\circ 20' E.$; all bearings checked by direct reading of the solar, and all angles checked by deflection;

Dist. on random line	39.12 chs.
Dist. by first triangulation	15.43
Dist. to point in wash	54.55
Dist. by second triangulation	13.26
	67.81

67.81 Top of series of precipitous cliffs.

78.22 A point 30 lks. S. of the standard cor. of Tps. 35 S.,

Rs. 2 and 3 E., heretofore described.

A true line from the position for the standard cor. of

471

Resurvey of part of the
Seventh Standard Parallel South, thru R. 2 E.

Chains

secs. 32 and 33 to the standard sec. cor. of secs. 35 and 36 bears N.89°36'E. The line from the stan. cor. of secs. 35 and 36 to the old witness cor. on S. bdy. of sec. 36 bears N.89°34'E.; the line from the witness cor. to the standard $\frac{1}{4}$ sec. cor. of sec. 36 bears N. 89°31'E.; and the line from the standard $\frac{1}{4}$ sec. cor. to the standard cor. of Tps. 35 S., Rs. 2 and 3 E. bears N. 89° 34'E. 39.80 chs.

From the standard $\frac{1}{4}$ sec. cor. on S. bdy. of sec. 36, which is a sandstone, 10 x 8 ins., 24 ins. above ground marked and witnessed as described by surveyor general. S.89° 31'W., on a true line, on S. bdy. of sec. 36. Asc. 156 ft over gradual NE. slope, thru dense timber.

17.50 Ridge, bears NE. and SW., thence over flat top of ridge.

27.98 The old witness standard cor. of secs. 35 and 36, which is a sandstone, 18 x 10 x 6 ins., set in a mound of stone, properly marked and witnessed by two bearing trees on the N. As this witness cor. is not recorded in the field notes I am unable to use it for reestablishing the standard cor. of secs. 35 and 36, but I do use it for determining alignment. I cut the marks from the bearing trees and obliterate the marks on the stone, marking it A P.

Thence, S.89° 34'W.

28.00 Begin abrupt desc. of 402 ft. over NW. slope.

38.98 Schow's cabin bears North about 20.00 chs. dist.

39.21 Midway between the standard $\frac{1}{4}$ sec. cor. of sec. 36 and the standard $\frac{1}{4}$ sec. cor. of sec. 35.

Set an iron post, 3 ft. long, 2 ins. diam., 28 ins. in the ground, for standard cor. of secs. 35 and 36, with brass cap marked

General Description.

This township lies on a general NE. slope and is very

badly cut up by washes in box canyons.

The soil, where there is any, is rocky clay, under -
laid at varying depths, by solid sandstone.

There is an exceptional supply of water in this township.
Canaan Creek and Willow Spring Creek, flowing about
3 lks. wide and 5 ins. deep in summer, enter it at the
SW. corner, flow together in section 4 and leave in
section 2. There is water rising in Heep's Wash, in
sec. 12 and flow for a short distance.

There is a seep of good water at the $\frac{1}{4}$ sec. corner
bet. secs. 27 and 28, one in Horse Spring Canyon, in
the SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of sec. 15, Oak Spring in the NE $\frac{1}{4}$
of the NE $\frac{1}{4}$ of sec. 13 and a very small seep in sec. 24.

The principal vegetation is scrub cedar and pinon pine,
with scattering firs and yellow pine in the western
portion of the township, along the east sides of deep
washes; there is also a scattering growth of bitter
berry, service berry, silver leaf and thimble berry
brush. Sagebrush and a little grass in the flat bottom
of gulches.

Nearly the entire north half of the Tp. is under laid
with a fair quality of coal, which has been mined to
a small extent in sec. 12. The coal mines that supply
Escalante lie in secs. 35, T. 35 S., R. 2 E., just N.
of the north boundary of this Tp..

There is a log cabin in sec. 13, NE $\frac{1}{4}$, belonging to Dave
Moosman, and several tentative claims in secs. 24,
25 and 36, but no one living in the township.

TRANSITMAN CERTIFICATE OF UNITED STATES SURVEYOR

I, Edie S. C. Smith Transitman
U. S. Surveyor, hereby certify upon honor that, in pursu-

of special instructions received from the U. S. Surveyor General for Utah

bearing date of the 12th day of November, 1921, I have well, faithfully, and to

in my own proper person, and in strict conformity with said instructions, the Manual of Surveying Instru-

tions, and the laws of the United States, surveyed all those parts or portions of the Seventh

Standard Parallel South, thru R. 2 E., East and West Boundaries

and Subdivisions of T. 36 S., R. 2 E.

of the Salt Lake Base

and Principal Meridian, in the State of Utah

on ~~dates shown on~~ date diagram, which are represented in

the foregoing field notes, as having been executed by me, and under my direction, and that all the corners of

said survey have been established and perpetuated in strict accordance with the Manual of Surveying Instruc-

tions, and the special written instructions of the U. S. Surveyor General for Utah

and in the specific manner described in the field notes, and that the foregoing are the original field notes of

such survey.

Helena, Montana
